EXPERIENCE

Jovian Ambassador

Jovian.ai

Apr 2020 - Present UDOM, Dodoma, Tanzania

Speaker on Python & Deep Learning

Python Conference Tanzania

Dec 14-15, 2020 SeedSpace, Dar es Salaam, Tanzania

Organizing Committee | Marketing & Communications Manager

Achievers Conference

Dec 24-27, 2020 Arusha, Tanzania

Organizing Committee | University representative: UmojaHack, Zindi Interuniversity AI Hackathon

Zindi Africa

March 21, 2020 UDOM, Dodoma, Tanzania

Organizing Committee and Speaker

Artificial Intelligence and Life

Jun 2019 & Jan 2020 UDOM, Dodoma, Tanzania

OGV Product Manager

AIESEC in UDOM

Feb 2020 - Jan 2021 UDOM, Dodoma, Tanzania

Artificial Intelligence Community Logistics Manager

UDOM AI Community

Aug 2019 - Jul 2020 UDOM, Dodoma, Tanzania

GE Product Manager

AIESEC in UDOM

Feb 2019 - Jan 2020 UDOM, Dodoma, Tanzania

Speaker on Machine Learning

Python Conference Tanzania

Dec 10-11, 2020 SeedSpace, Dar es Salaam, Tanzania

Organizing Committee | Logistics Manager

Ignite Conference

Dec 11-14, 2019 Morogoro, Tanzania

Organizing Committee

Join The Idea Program by Empower, TCC and JTI

June, 2019 CBE, Dodoma, Tanzania

Speaker on Python

CIVE AI Community

Dec 09-10, 2019 UDOM, Dodoma, Tanzania

Participant

Achievers Conference

Mar 18-21, 2019 Mwanza, Tanzania

EDUCATION

B.Sc in Telecommunications Engineering

The University of Dodoma

2016 - 2020 Dodoma, Tanzania

MOST PROUD OF

- Best Student Project**
COVID-19 and Pneumonia Detection System Using Artificial Intelligence - The University of Dodoma Awards - 2020.
- Fourth Postion Winner**
COVID-19 and Pneumonia Detection System Using Artificial Intelligence - UDOM-CIVE Day 2020.
- Fifth Postion Winner**
LUKU Minimum Unit Detection and Notification System Using GSM - UDOM-CIVE Day 2020.

SO FAR PROJECT EXPERIENCE

Improving Pharmacovigilance Systems using Natural Language Processing on Electronic Medical Records.

The research focused on enhancing Pharmacovigilance Systems using Natural Language Processing on Electronic Medical Records (EMR). The major task was to develop an NLP model for extracting Adverse Drug Reactions (ADRs) cases from EMR systems.

COVID-19 and Pneumonia Detection System Using Artificial Intelligence.

A project aimed at creating an AI based system to aid in diagnosis of COVID-19 by the use of chest X-ray images, where it reduces, time for diagnosis, increases accuracy by avoiding human bias and also reduces diagnosis costs.

LUKU Minimum Unit Detection and Notification System Using GSM.

The project aimed at creating a system which will be notifying domestic electricity users the minimum unit(s) remained before they are finished.

Automatic Data Analysis System.

In machine learning data analysis specifically features engineering is a very tedious work, so the system aimed at help data scientists get insights about their data automatically using the system.

SOFTSKILLS

Public Speaking

Having a excellent public speaking skills from being a speaker in different workshops, conferences and learning sessions.

Project Management

I have been able to be a product manager of AIESEC in UDOM in two different terms managing Global Entrepreneur (for the term 2019-2020) and Outgoing Global Volunteer (for the term 2020-2021).

Communication

Ability to give feedback and providing the needed information in quality and understandable ways.

Marketing

Ability to show customers the value proposition of a product(s), which involves having customer experience knowledge of which I acquired when I worked as a marketing and communications manager during Achievers Conference 2020.

Presentation

I have been a speaker in different conferences including the largest Python community Conference(PyCon) Tanzania 2019 & 2020 where I presented sessions on different topics such as Python Programming Language, Machine Learning, and Deep Learning.

STRENGTHS

Hard-working (18/24)

Persuasive

Motivator & Leader

UX

Web Development & Applications

Product Management & Logic Designer
